

Help Contents – How to play Sudoku Game

Rules of the Game:

1. Enter a number between 1 and 9 in a 9x9 grid.
2. The numbers in the grid must adhere to the following guidelines (See Figure 1.1):
 - There cannot be any duplicate numbers in the same row and the same column of the 9x9 grid.
 - There cannot be any duplicate numbers in each 3x3 section of the grid.

Managing a Game

1. To start a new game, under the File menu, select New Game. Then, indicate which skill level you would like to play the game (Beginner, Intermediate, or Advanced). The new game will then load.
2. To save the game, select Save Game under the File menu.
3. To open a previously started game, under File, select Load Game and choose the file containing the game that you would like to load.
4. Select Exit in the File menu to exit the game.

Game Controls

At the bottom of the game grid, there are four different buttons that can be used to control different aspects of the game.

To undo a move in a game (revert back to the previous move), press the Undo button.

To reset the whole grid, click Reset.

To check if your solution to the puzzle is correct, click Check Solution.

To reveal the solution to the puzzle, click Show Solution.
